

MELGES¹⁴

THE MELGES 14 — NEW AND EXCITING!

Built by Melges and designed by Reichel Pugh, the Melges 14™ exudes innovation and excellence in one-design sailing. It's quality, speed, durability, comfort and fun all wrapped into one modern sailing package. Developed and tested by the Melges Team over a two-year period; the M14 offers an exceptional upwind and downwind sailing experience compared to other boats in its size range. Perfect for all ages, the Melges 14 is simple to sail and features a comfortable and large, wide-open cockpit. No bailing and no bailers! The durable carbon mast and boom add to its performance making it easy and quick to rig. You can car top the Melges 14, or put it on a lightweight trailer and tow behind any vehicle. The boat is easy to move around on the custom Melges 14 dolly too. A fantastic ramp and beach boat for family fun.

Let's sail cool boats — the Melges 14!
